### Installation using supplied Ragbolt

- 1. Pour concrete footing with ragbolt and water supply in place. Top of ragbolt must be installed 52mm above concrete.
- 2. Apply Leveling/Spacer plate and level in both directions using supplied bolts and washers approximately 25-27mm above concrete.
- 3. With front service panel removed, thread water supply pipe through the bottom of the drink fountain and align holes with ragbolt to bolt in place on top of spacer.

**1.** Lay concrete around water supply pipe and ragbolt. Ensure top of ragbolt is 52mm (approx.) above top of concrete

2. Leveling and Spacer Plate Using spirit level both directions - ensure this plate is made level using supplied flat washer and nuts both side of plate

above concrete
