

Stainless Steel Chess Board

Model 25487 - Stainless Steel Chess Board

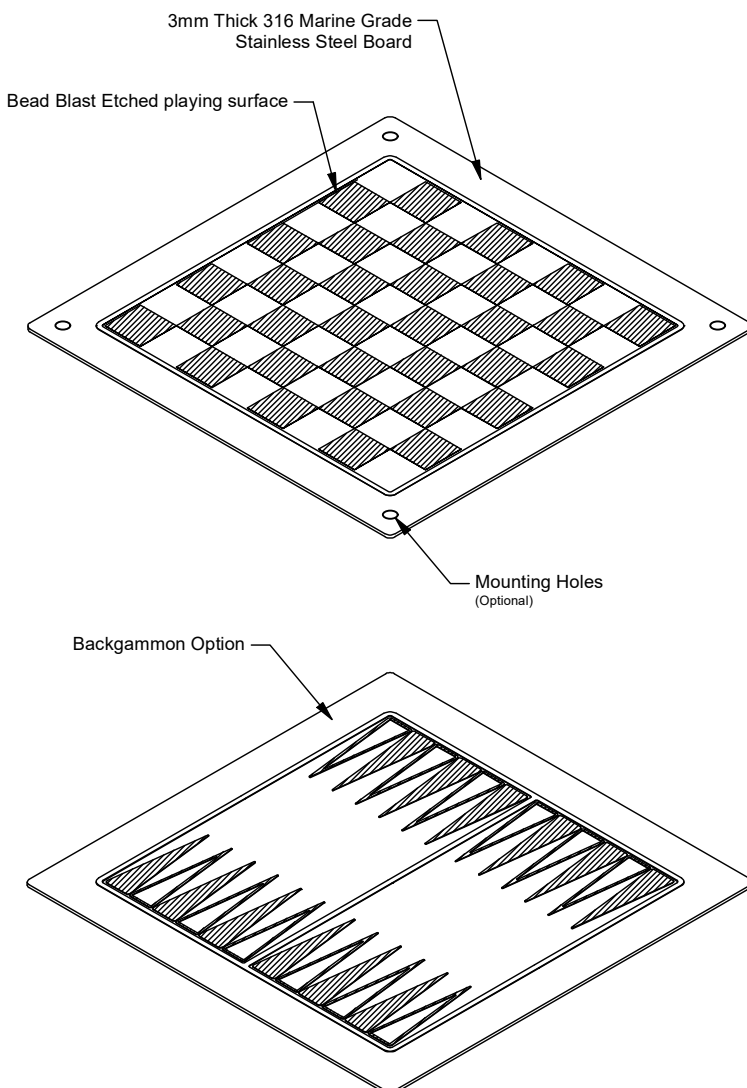

DRAFFIN
Street Furniture

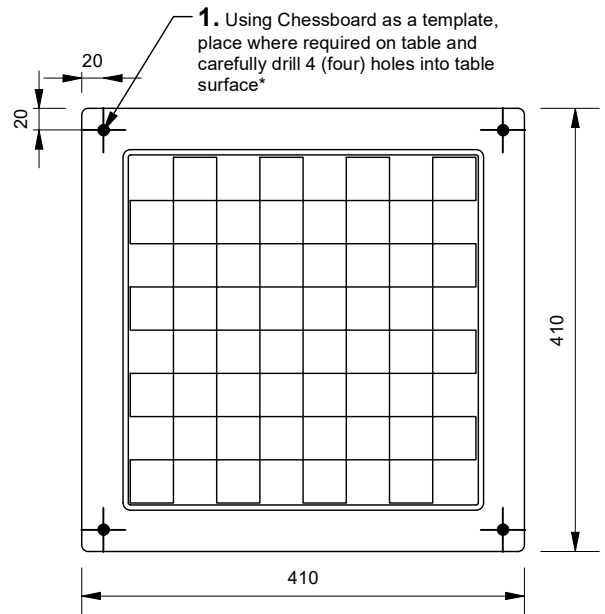

This all weather chess board insert is made of marine grade 316 stainless steel. The chess board pattern is etched to the 3mm plate. Tough, corrosion resistant and can be installed on literally any surface, including all of Draffin Street Furniture's table settings. A Backgammon board variant is also available

Options

- Add Mounting Holes
- Backgammon Board (Chessboard is Standard)

To Install:

*To avoid scratching top of chess board. Ensure drill does not follow through after hole is complete.

2. Fix to surface using only stainless steel fasteners. Button head screws or bolts are recommended for this application (not supplied)

The Stainless Steel Chess Board can be specified into most Draffin Street Furniture table settings. The option will be available to select on relevant product pages. When selected to be pre-installed onto new tables the chess board will have studs welded under the board, with no visible top fasteners.

Alternatively, they can be retrofitted to any surface including tables, following the installation instructions above.
