# 800 Series Bin Surround Installation

## Installation Guide - 800 Series High Pyramid Cover Bin Surround (Multi-bay)

### 800 Series Multi-bay feature

Each 800 Series bay provides four mounting holes on each of the side panels to fix multiple bays side by side.

(shipped as single bay for assembly onsite - fasteners supplied with every 800 series bin surround)

Multi-bay applications include:

- extra capacity
- waste separation

**4.** Place bin surround(s) in desired final location (with regard to final positioning on slab using detail indicated on "leveling strap" diagram (bottom, right))

**5.** Using Leveling Strap mounting holes as a template, drill ground surface to suit chosen ground anchors then fit ground anchors.

**6.** Once the leveling straps are fixed to the surface, adjust the leveling nuts while the locking nuts are loose to level the end opposite the door. Ensure adjustment is locked down using lock nuts.  
(Loose lock nuts may provide a false level)

**7.** Level the door side so that the whole surround is level and the door gaps are parallel and even all around, and lock down after adjustment.

**8.** Recheck all levels and door gaps and retighten lock nuts on leveling straps.

**1.** Bring Bays together

**3.** Join as many bays together as needed. (ignore if single bay)

\*Bay openings can be configured in any order and can face the front or the back

fig:a

### Leveling Straps

Adjust leveling straps opposite doors first

Adjust leveling straps under doors

Ensure all door gaps are parallel and even using leveling straps
