800 Series Bin Surround Installation

Installation Guide - 800 Series Low Pyramid Cover Bin Surround
(Multi-bay)

DRAFFIN
Street Furniture

800 Series Multi-bay feature

Each 800 Series bay provides four mounting holes on each of the side panels to fix multiple bays side by side.

(shipped as single bay for assembly onsite - fasteners supplied with every 800 series bin surround)

Multi-bay applications include:

- extra capacity
- waste separation

4. Place bin surround(s) in desired final location (with regard to final positioning on slab using detail indicated on "leveling strap" diagram (bottom, right))

5. Using Leveling Strap mounting holes as a template, drill ground surface to suit chosen ground anchors then fit ground anchors.

Drill ground anchor holes through leveling strap mounting holes

6. Once the leveling straps are fixed to the surface, adjust the leveling nuts while the locking nuts are loose to level the end opposite the door. Ensure adjustment is locked down using lock nuts.

(Loose lock nuts may provide a false level)

Adjust leveling straps opposite doors first

7. Level the door side so that the whole surround is level and the door gaps are parallel and even all around, and lock down after adjustment.

Adjust leveling straps under doors

Ensure all door gaps are parallel and even using leveling straps

8. Recheck all levels and door gaps and retighten lock nuts on leveling straps.

1. Bring Bays together

2. Fasten through panels internally (ignore if single bay)

fig:a

3. Join as many bays together as needed. (ignore if single bay)

*Bay openings can be configured in any order and can face the front or the back

- internal view

Leveling Straps

Installation using Stainless Steel Level Adjustable Footstrap

Installation without Stainless Steel Level Adjustable Footstrap
