Landfill
Rubbish placed in this bin is sent to local landfill sites and eventually covered up. If your rubbish can be recycled, please use the appropriate bin.

33188/LAND

Coffee Cups
Although they look like they are paper, disposable or impulse coffee cups are usually lined with plastic. This contaminates paper or plastic recycling bins. Dispose of single use coffee cups in this bin.

33188/COF

Recycling
This is a compulsory recycling waste bin. It accepts all standard recycling materials except glass which is collected separately. Please use this bin for paper, cardboard, plastic and aluminium or steel cans.

33188/REC

Hard Plastic
Cleaning and detergent bottles, ice cream containers (fida, nice bottles, milk bottles), shampoo, conditioner and shower gel bottles, and of course Soft drink bottles are all easily recyclable and can be placed in this bin.

33188/HPL

Paper & Cardboard
Paper products can be recycled over and over again. Let's keep paper out of landfill.

33188/PAP

Organics
"Food Organics/Garden Organics" or FOOD is a valuable biodegradable resource that can be converted to nutrient-rich compost, which prevents a considerable amount of waste from landfill, and reduces greenhouse gases.

33188/ORG

Cans & Aluminium
Steel and aluminium cans are infinitely recyclable. As long as they are clean, place them in this bin.

33188/AL

Soft Plastics
Soft plastics (i.e. scrunchable plastic) can be recycled into new products, an additive for rough roads, a replacement for aggregate in concrete, or even a material for making shopping trolleys and baskets.

33188/SPL

This decal set is formatted for easy customisation to provide clear instruction to the bin user as to the waste type the bin does or does not accept.

1. Choose the waste stream type - to avoid confusion, this will determine the national standard colour used for the waste type also. eg: Glass - Purple, Organics - Green

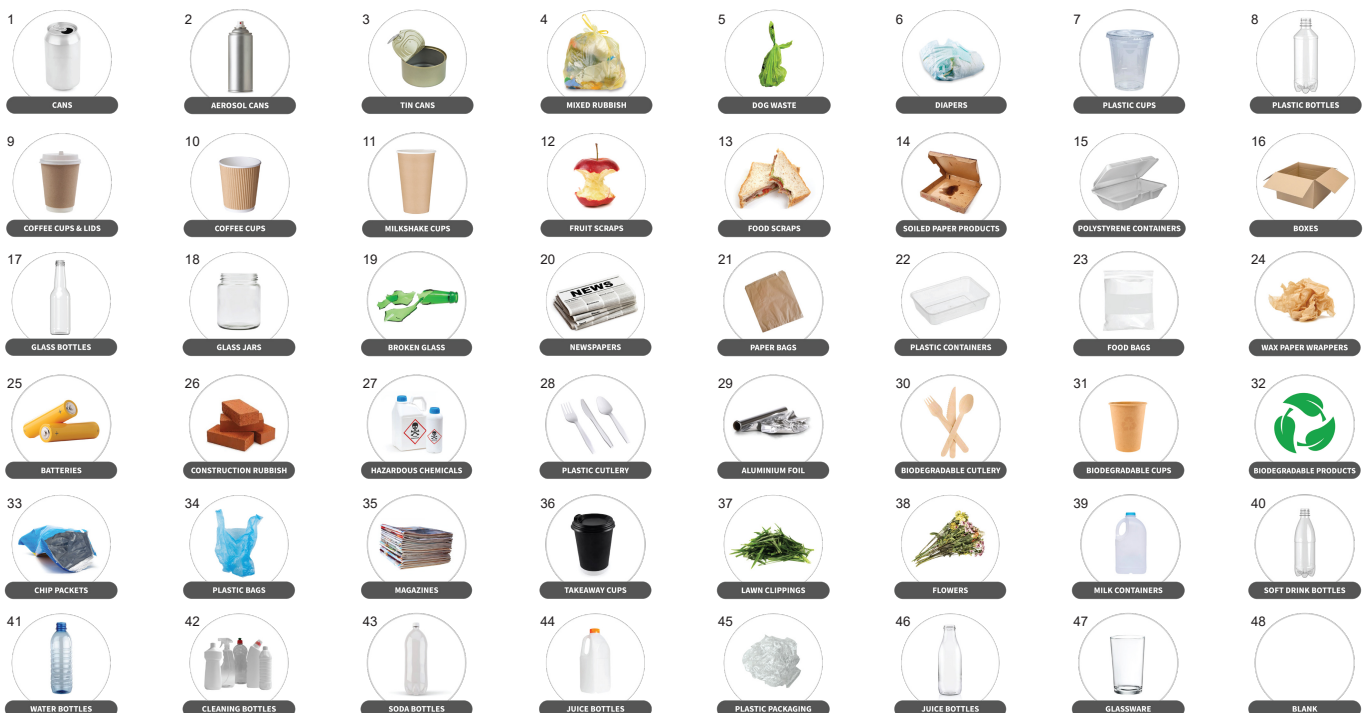

2. Provide a short note to include beneath the heading - This can say anything you wish. Perhaps provide interesting or useful information about the waste type regarding how the resource is re-used/recycled, how it saves the environment by diverting it from landfill, how to identify the waste type. Space is limited, so keep it brief and to the point.

3. Choose Six Badges - Choose from 48 standard badges that cover everything from organic to hazardous waste. While there may not be enough badges for your waste type to cover six positions, it is important to also indicate what is **not** accepted in the bin. Waste types not accepted get a red 'X'. A mix of all these badges should provide the user a clear message of the waste type the bin accepts.

Glass
Glass only recycling increases recovery of this material and keeps contamination of glass in other recycle streams to a minimum. Place it in this bin so it can be remade into new products, again and again.

Customer Name _____ Organisation _____ Order Number _____

1. Bin Surround Model *(including wheelie bin size)* _____

2. Choose Waste Stream Type

- | | |
|---|---|
| <input type="checkbox"/> Landfill - Red - 33188/LAND | <input type="checkbox"/> Paper & Cardboard - Blue - 33188/PAP |
| <input type="checkbox"/> Coffee Cups - Red - 33188/COF | <input type="checkbox"/> Organics - Green - 33188/ORG |
| <input type="checkbox"/> Recycling - Yellow - 33188/REC | <input type="checkbox"/> Glass - Purple - 33188/GLA |
| <input type="checkbox"/> Hard Plastic - Yellow - 33188/HPL | <input type="checkbox"/> Soft Plastics - Orange - 33188/SPL |
| <input type="checkbox"/> Cans & Aluminium - Yellow - 33188/AL | |

3. Provide message to include beneath the heading

4. Choose Six Badges

Badges and their corresponding badge numbers can be found on the previous page. Fill in the badge numbers in the positions on the sign below. Check the "Red Cross" box if the badge should include a red 'X' that indicates a waste type the bin does not accept.

Waste Type

Short message about the waste type the bin accepts. This can include how the waste resource is re-used or recycled, how it is diverted from landfill, protects the environment or even your organisations pro-recycling stance!
