Assembly

The Semi-Circular Bench is shipped in halves to save on freight volume. Once delivered, the bench will require assembly. The bench can be configured as a single semi-circular unit or fixed to another semi-circular unit for full circle applications. Two spacers are provided per semi-circle unit to join the half units together.

For semi-circular configuration: Bring halves together using the supplied **spacer with mount** between each half. Use supplied fasteners to fix units together.

For full circle configuration: Assemble halves (as above) using spacer with mount, then bring assembled semi-circles together using a supplied standard spacer (pictured below) between each semi-circle. Use supplied fasteners to fix units together.

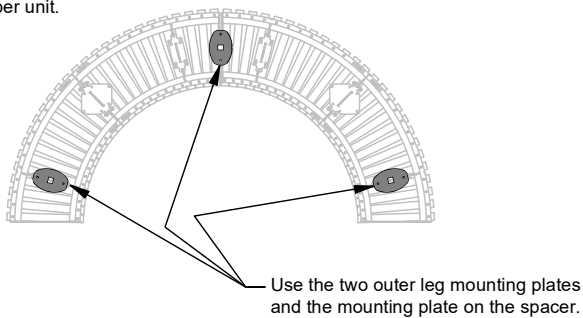

Leg Placement

Depending on the application, the leg placement will change to ensure best performance and stability. This applies to all leg types in the Wandin range except the plinth mount variant.

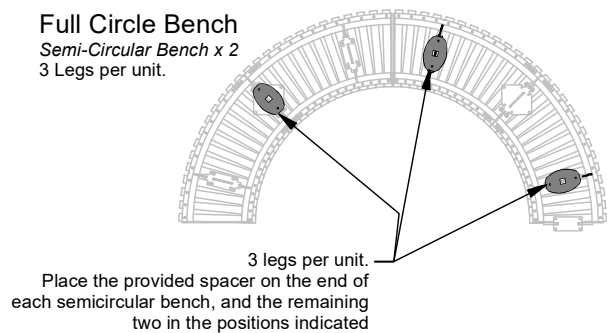

Semi-Circular Bench

3 Legs per unit.

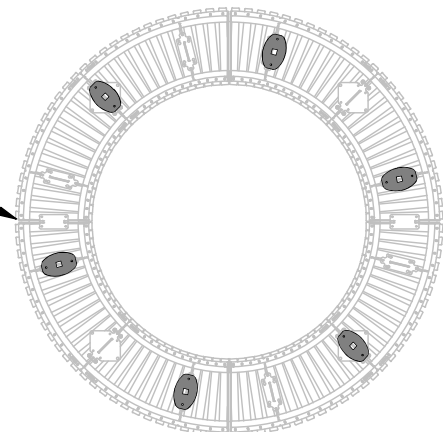

Full Circle Bench

Semi-Circular Bench x 2
3 Legs per unit.

Even leg spacing can be achieved using the above recommended leg mounting positions.

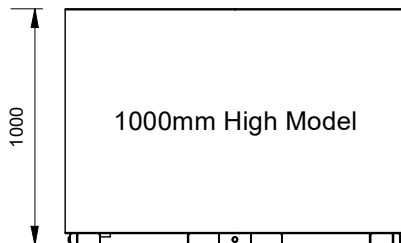

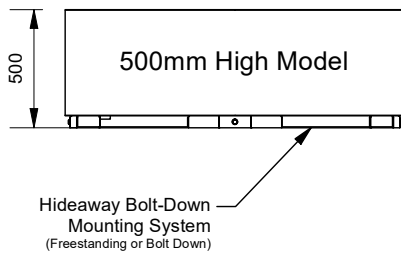

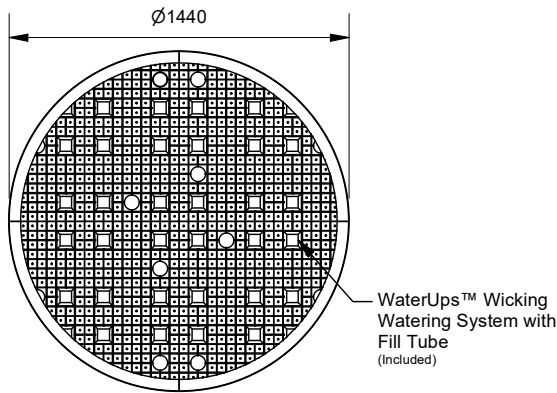

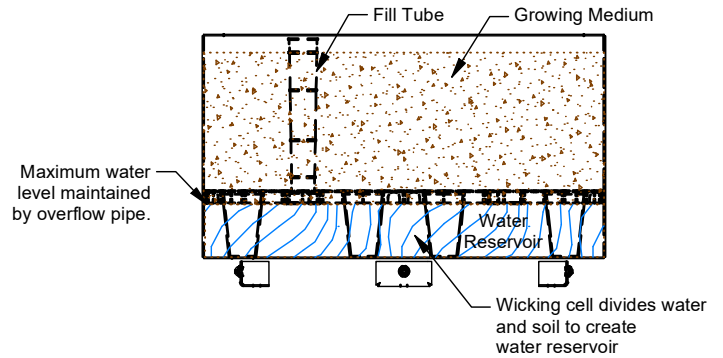

Hamilton Round Planter

68x14405 - Ø1440mm x 500mm High Hamilton Round Planter
 68x14410 - Ø1440mm x 1000mm High Hamilton Round Planter

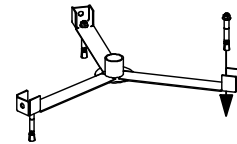

All Hamilton Planters incorporate WaterUps™ wicking cells that make setting up a wicking garden planter easy. A built in overflow pipe prevents overfilling the planter ensuring ideal soil hydration. Plus Hamilton Planters also employ a hideaway mounting system that also makes installation simple.

Watering Management

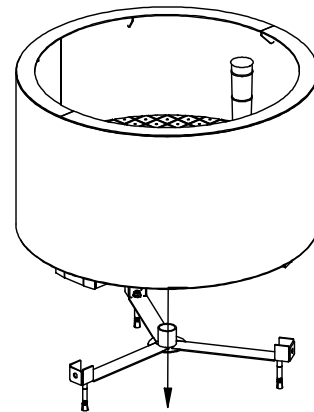

Mounting

1. Fix footing to surface
 Recommended minimum 100mm anchor for installation

2. Locate planter over footing.

3. Bolt through footing to fix
